We are exploring excellent dental implant solutions

Since 2009, we have been developing patient-customize abutment, and all of our dentists and dental technicians are also trying to make the fittest implant prosthesis for each individual person.

For Ideal Implant Restorations

We have a commitment to provide the best implant solution at a reasonable price, easy and fast way for everyone.

Co-Cr Abutment Wax up & Casting

CAD/CAM Abutment CAD design & CAM milling

For Digital Implant Solution

It is possible to make implant prosthesis by using a scanner, dental CAD, milling machine and 3D printer as developing our own digital solution for dental clinic and laboratory.

Instructions of CCM Casting Abutment

< Screw Type manufacturing>

CCM Casting abutment

Status of Wax-up the connection of the metal part has more wax to prevent the occurrence of air bubble in the connection part.

Status after casting of general Porcelain metal.

Investment material and the oxide film is removed by using a Glass bead (50um/ 2-4 bar)

The oxide film can be removed cleanly without damaging the internal side of Hex.

The Junction is checked in the shape of work in the condition where the oxide film is removed.

Upon sanding with alumina oxide, it can be the cause of plaque.

Status after the oxide film is removed.

The formation of oxide film can be observed on the basal area of firing porcelain.

The firing porcelain part is wrapped by using wax.

The oxide film is removed by using the Glass bead.

The oxide film of internal side of Access hole is removed.

Final compatibility of finished upper structure is checked.
